Features

- USB redirection
 - Required software installation : UsbDk
 - First point : Define the USB redirection when we create the entity into configuration tabs.
 - Second point : Start the entity and double click to open a new tab that permit to interact with the entity (screen offset).
 - Third point : When we are in this tab, we can access to « USB redirection ».
 - This option permit to configure USB device to be active for the entity.

USB redirection

- - Entity is defined or undefined

• Entity is started **and** no screen offset

• Entity is started **and** screen offset is activate

Features

• USB redirection
